Handbook of Research in Mass Customization and

Personalization Sep 11 2021 A growing heterogeneity of demand, the advent of "long tail markets", exploding product complexities, and the rise of creative consumers are challenging companies in all industries to find new strategies to address these trends. Mass customization

(MC) has emerged in the last decade as the premier strategy for companies in all branches of industry to profit from heterogeneity of demand and a broad scope of other customer demands. The research and practical experience collected in this book presents the latest thinking on how to make mass customization work. More than 50 authors from academia and management debate on what is viable now, what did not work in the past, and what lurks just below the radar in mass customization, personalization, and related fields. Edited by two leading authorities in the field of mass customization, both volumes of the book discuss, among many other

themes, the latest research and insights on customization strategies, product design for mass customization, virtual models, co-design toolkits, customization value measurement, open source architecture, customization communities, and MC supply chains. Through a number of detailed case studies, prominent examples of mass customization are explained and evaluated in larger context and perspective.

Verification, Validation and Testing in Software

Engineering Dec 26 2022 "This book explores different applications in V & V that spawn many areas of software development -including real

time applications- where V & V techniques are required, providing in all cases examples of the applications"--Provided by publisher.

Data Science and Social

Research Dec 22 2019 This edited volume lays the groundwork for Social Data Science, addressing epistemological issues, methods, technologies, software and applications of data science in the social sciences. It presents data science techniques for the collection, analysis and use of both online and offline new (big) data in social research and related applications. Among others, the individual contributions cover topics like

social media, learning analytics, clustering, statistical literacy, recurrence analysis and network analysis. Data science is a multidisciplinary approach based mainly on the methods of statistics and computer science, and its aim is to develop appropriate methodologies for forecasting and decision-making in response to an increasingly complex reality often characterized by large amounts of data (big data) of various types (numeric, ordinal and nominal variables, symbolic data, texts, images, data streams, multi-way data, social networks etc.) and from diverse sources. This book presents selected papers from the

international conference on Data Science & Social Research, held in Naples, Italy in February 2016, and will appeal to researchers in the social sciences working in academia as well as in statistical institutes and offices.

Encyclopedia of Mobile Computing and Commerce

Mar 29 2023 The

"Encyclopedia of Mobile Computing and Commerce" presents current trends in mobile computing and their commercial applications. Hundreds of internationally renowned scholars and practitioners have written comprehensive articles exploring such topics as location and context

awareness, mobile networks, mobile services, the socio impact of mobile technology, and mobile software engineering.

From Semantics to Computer Science Jun 20 2022 Gilles

Kahn was one of the most influential figures in the development of computer science and information technology, not only in Europe but throughout the world. This volume of articles by several leading computer scientists serves as a fitting memorial to Kahn's achievements and reflects the broad range of subjects to which he contributed through his scientific research and his work at INRIA, the French National

Institute for Research in Computer Science and Control. The authors also reflect upon the future of computing: how it will develop as a subject in itself and how it will affect other disciplines, from biology and medical informatics, to web and networks in general. Its breadth of coverage, topicality, originality and depth of contribution, make this book a stimulating read for all those interested in the future development of information technology.

Meeting User Information Needs in Recommender Systems Jul 21 2022

A Biography of Power: Research and Excavations at the Iron Age 'oppidum' of

Bagendon, Gloucestershire (1979-2017) Jul 29 2020 This book explores the changing nature of power and identity from the Iron Age to the Roman period in Britain. It provides fresh insights into the origins and nature of one of the lesser-known, but perhaps most significant, Late Iron Age 'oppida' in Britain: Bagendon in Gloucestershire.

Recent Developments in Mobile Communications Aug 10 2021 Recent Developments in Mobile Communications - A Multidisciplinary Approach offers a multidisciplinary perspective on the mobile telecommunications industry. The aim of the chapters is to offer both comprehensive and

up-to-date surveys of recent developments and the state-of-the-art of various economical and technical aspects of mobile telecommunications markets. The economy-oriented section offers a variety of chapters dealing with different topics within the field. An overview is given on the effects of privatization on mobile service providers' performance; application of the LAM model to market segmentation; the details of WAC; the current state of the telecommunication market; a potential framework for the analysis of the composition of both ecosystems and value networks using tussles and control points; the return of quality investments

applied to the mobile telecommunications industry; the current state in the networks effects literature. The other section of the book approaches the field from the technical side. Some of the topics dealt with are antenna parameters for mobile communication systems; emerging wireless technologies that can be employed in RVC communication; ad hoc networks in mobile communications; DoA-based Switching (DoAS); Coordinated MultiPoint transmission and reception (CoMP); conventional and unconventional CACs; and water quality dynamic monitoring systems based on web-server-embedded

technology.

Evidence Based Practice in School Mental Health Apr 30 2023

Though recent legislation embedded with the No Child Left Behind Act and the Individuals with Disabilities Improvement Act mandates the use of evidence in school-based practice to demonstrate positive outcomes for all students, school social workers - especially those long out of school - often lack the conceptual tools to locate, evaluate, and apply evidence in order to demonstrate the effectiveness of their work. The first of its kind tailored specifically to this audience, this SSAAA Workshop title guides school professionals in

infusing research throughout their daily practice. It shows school service providers a pragmatic approach to informing every major practice decision with the appropriate research so that students receive the best possible services. This includes how to use research to make reliable and valid assessments, how to use research to choose the best intervention, and how to do research to evaluate progress. Raines goes beyond creating a catalog of interventions that will soon be outdated and provides school social workers with a detailed road map of the EBP process. Chapters detail the nuts and bolts of EBP, explaining how to ask a

relevant, answerable question; where to search for evidence; how to appraise the literature and avoid the pitfalls of web based information; how to adapt and apply the evidence in a developmentally and culturally sensitive way; and how to evaluate the results. Detailed examples along the way, including sample spreadsheets practitioners can easily adapt to evaluate their students' progress, bring accountability within reach for school professionals who struggle to find the time, resources, and support sufficient to apply the best evidence to their schools. [Cartographic Strategies of Postmodernity](#) Oct 12 2021 The

last fifty years have witnessed the growing pervasiveness of the figure of the map in critical, theoretical, and fictional discourse. References to mapping and cartography are endemic in poststructuralist theory, and, similarly, geographically and culturally diverse authors of twentieth-century fiction seem fixated upon mapping. While the map metaphor has been employed for centuries to highlight issues of textual representation and epistemology, the map metaphor itself has undergone a transformation in the postmodern era. This metamorphosis draws together poststructuralist conceptualizations of

epistemology, textuality, cartography, and metaphor, and signals a shift away from modernist preoccupations with temporality and objectivity to a postmodern pragmatics of spatiality and subjectivity. *Cartographic Strategies of Postmodernity* charts this metamorphosis of cartographic metaphor, and argues that the ongoing reworking of the map metaphor renders it a formative and performative metaphor of postmodernity. *Social Media and Networking: Concepts, Methodologies, Tools, and Applications* Jan 03 2021 In the digital era, users from around the world are constantly connected over a global network, where they

have the ability to connect, share, and collaborate like never before. To make the most of this new environment, researchers and software developers must understand users' needs and expectations. *Social Media and Networking: Concepts, Methodologies, Tools, and Applications* explores the burgeoning global community made possible by Web 2.0 technologies and a universal, interconnected society. With four volumes of chapters related to digital media, online engagement, and virtual environments, this multi-volume reference is an essential source for software developers, web designers, researchers, students, and IT

specialists interested in the growing field of digital media and engagement. This four-volume reference includes various chapters covering topics related to Web 2.0, e-governance, social media activism, internet privacy, digital and virtual communities, e-business, customer relationship management, and more.

The Oxford Handbook of Cognitive Engineering Feb 28 2023 This handbook is the first to provide comprehensive coverage of original state-of-the-science research, analysis, and design of integrated, human-technology systems.

Knowledge-Based Intelligent Information and

Engineering Systems May 27 2020 Dear delegates, friends and members of the growing KES professional community, welcome to the proceedings of the 9th International Conference on Knowledge-Based and Intelligent Information and Engineering Systems hosted by La Trobe University in Melbourne Australia. The KES conference series has been established for almost a decade, and it continues each year to attract participants from all geographical areas of the world, including Europe, the Americas, Australasia and the Pacific Rim. The KES conferences cover a wide range of intelligent systems topics.

The broad focus of the conference series is the theory and applications of intelligent systems. From a pure research field, intelligent systems have advanced to the point where their abilities have been incorporated into many business and engineering application areas. KES 2005 provided a valuable mechanism for delegates to obtain an extensive view of the latest research into a range of intelligent-systems algorithms, tools and techniques. The conference also gave delegates the chance to come into contact with those applying intelligent systems in diverse commercial areas. The combination of theory and

practice represented a unique opportunity to gain an appreciation of the full spectrum of leading-edge intelligent-systems activity. The papers for KES 2005 were either submitted to invited sessions, chaired and organized by respected experts in their fields, or to a general session, managed by an extensive International Program Committee, or to the Intelligent Information Hiding and Multimedia Signal Processing (IIHMSP) Workshop, managed by an International Workshop Technical Committee.

Context Sensitive Health Informatics: Human and Sociotechnical Approaches April 25 2020 Healthcare

information technologies are now routinely deployed in a variety of healthcare contexts. These contexts differ widely, but the smooth integration of IT systems is crucial, so the design, implementation, and evaluation of safe, effective, efficient and easy to adopt health informatics involves careful consideration of both human and organizational factors. This book presents the proceedings of the Context Sensitive Health Informatics (CSHI) conference, held in Copenhagen, Denmark, in August 2013. The theme of this year's conference is human and sociotechnical approaches. The Human Factors approach is distinctly design-driven and

aims to optimize performance, safety and users' sense of well-being associated with their use of a system through the application of user-centered systems design and evaluation. The papers and presentations included here are grouped under the topics: patients and IT; usability test and evaluation; work tasks and related contexts; human factors and simulation; and context and systems design, and outline theories and models for studying contextual issues and insights related to how health information technologies can be better designed to accommodate different healthcare contexts. Healthcare organizations,

health policy makers and regulatory bodies globally are starting to acknowledge this essential role of human and organizational factors for safe and effective health information technology. This book will be of interest to all those involved in improving the quality of healthcare worldwide.

Web Engineering Mar 17 2022
Web engineering is a new discipline that addresses the pressing need for systematic and tool-supported approaches for the development, maintenance and testing of Web applications. Web engineering builds upon well-known and successful software engineering principles and practices, adapting them to

the special characteristics of Web applications. Even more relevant is the enrichment with methods and techniques stemming from related areas like hypertext authoring, human-computer interaction, content management, and usability engineering. The goal of the 4th International Conference on Web Engineering (ICWE 2004), in line with the previous ICWE conferences, was to work towards a better understanding of the issues related to Web application development. Special attention was paid to emerging trends, technologies and future visions, to help the academic and industrial communities identify the most challenging tasks for

their research and projects. Following a number of successful workshops on Web engineering since 1997 at well-known conferences, such as ICSE and WWW, the first conference on Web engineering was held in Cáceres, Spain in 2001. It was followed by ICWE 2002 in Santa Fe, Argentina and ICWE 2003 in Oviedo, Spain. In 2004 ICWE moved to the center of Europe and was held in Munich, Germany from July 26 to 30. ICWE 2004 was organized by the Institute for Informatics of the Ludwig-Maximilians-Universität (LMU) Munich. The ICWE 2004 edition received a total of 204 submissions, out of which 25 papers were selected by the Program

amCommitteeasfullpapers(12% acceptance).

Geographical Information Systems May 19 2022 Web services, cloud computing, location based services, NoSQLdatabases, and Semantic Web offer new ways of accessing, analyzing, and elaborating geo-spatial information in both real-world and virtual spaces. This book explores the how-to of the most promising recurrent technologies and trends in GIS, such as Semantic GIS, Web GIS, Mobile GIS, NoSQL Geographic Databases, Cloud GIS, Spatial Data Warehousing-OLAP, and Open GIS. The text discusses and emphasizes the methodological aspects of such

technologies and their applications in GIS. *Understanding Aesthetics for the Merchandising and Design Professional* Aug 22 2022 Bridging the gap between the study of aesthetics and its application in the merchandising and design environments, the 2nd Edition of *Understanding Aesthetics* presents a research-based focus on the concepts of aesthetics and their effect on product value and consumer behavior. The multisensory approach to studying the elements and principles of design helps students master the underlying factors of successful design and learn how products and their

promotional surroundings can establish brand identity and create a pleasing environment for the consumer. *Sustaining Competitive Advantage via Business Intelligence, Knowledge Management, and System Dynamics* Mar 05 2021 Volume 22 includes two main chapters in both Part A and B. It appears in two parts because all chapters offer great depth in coverage of core issues senior executives must address for long-term survival of the firm: business intelligence, knowledge management, and understanding of the systems dynamics of interfirm behavior. *Online Brand Communities* Dec 02 2020 This book presents

and analyzes the concept of online brand communities, an emerging and exciting topic in marketing and eCommerce. First, it lays out the foundations like the evolution of the Web and the so-called Social Web, its utility for users and businesses, and the evolution of the marketing mind-set to adapt the Social Web. On this basis, the book then presents a detailed analysis of online brand communities, examining the concept of virtual community with a specific focus on virtual brand communities. In this context the book also explores recent trends related to branding and brand management. Next, it proposes

a classification system for online brand communities, taking into account questions like the motivating factors for consumers to join, participate and stay in a community. The process of value creation in communities is examined from both business and consumer perspectives. The book draws to a close with a brief presentation of the process broadly accepted for the successful development of online brand communities.

Agricultural Law and Economics in Sub-Saharan Africa Jan 15 2022 Agricultural Law in Sub-Saharan Africa: Cases and Comments introduces the subject of agricultural law and economics

to researchers, practitioners, and students in common law countries in Sub-Saharan Africa, and presents information from the legal system in Botswana, Gambia, Ghana, Lesotho, Malawi, Nigeria, Sierra Leone, South Africa, Swaziland, Tanzania, Zambia, and Zimbabwe. The law and economics approach entails the use of quantitative methods in research. This is consistent with the expectations in an applied economics field such as agricultural economics. Covering the general traditional law topics in contracts, torts, and property, the book goes further to introduce cutting-edge and

region-relevant topics, including contracts with illiterate parties, contract farming, climate change, and transboundary water issues. The book is supported by an extensive list of reference materials, as well as study and enrichment exercises, to deepen readers' understanding of the principles discussed in the book. It is a learning tool, first and foremost, and can be used as a stand-alone resource to teach the subject matter of agricultural law and economics to professionals new to the subject area as well as to students in law school, agricultural economics, economics, and interdisciplinary classes. Offers

research findings on such topics as food safety, climate change, transboundary natural resources, international sale of goods, patents, and trademarks to highlight the future sources of pressure on the agriculture industry Uses case-studies to provide real-world insights into the challenges and considerations of appropriate agricultural law development Challenges readers to carry out their own research in their areas of study, and to gain some understanding of the relationship between law, economics, and statistics Includes extensive resources, such as chapter summaries, study questions, and challenge questions at the end of each

chapter to assist instructors and students in gaining full benefits from using the book Provides separate instructor and student study guides, a test bank, and test bank answers, in hardcopy and electronic formats
Reference & User Services Quarterly Aug 30 2020
Transforming E-Business Practices and Applications: Emerging Technologies and Concepts Jul 09 2021
Transforming E-Business Practices and Applications: Emerging Technologies and Concepts presents an integrated view of the latest issues and technologies evolving from business transactions and support.

For the Benefit of All: Fiscal Policies and Equity-Efficiency Trade-offs in the Age of Automation Oct 24

2022 Many studies predict massive job losses and real wage decline as a result of the ongoing widespread automation of production, a trend that may be further aggravated by the COVID-19 crisis. Yet automation is also expected to raise productivity and output. How can we share the gains from automation more widely, for the benefit of all? And what are the attendant equity-efficiency trade-offs? We analyze this issue by considering the effects of fiscal policies that seek to redistribute the gains from

automation and address income inequality. We use a dynamic general equilibrium model with monopolistic competition, including a novel specification linking corporate power to automation. While fiscal policy cannot eliminate the classic equity-efficiency trade-offs, it can help improve them, reducing inequality at small or no loss of output. This is particularly so when policy takes advantage of novel, less distortive transmission channels of fiscal policy created by the empirically observed link between corporate market power and automation.

Human-Computer Interaction: Users and Applications Sep 23

2022 This four-volume set LNCS 6761-6764 constitutes the refereed proceedings of the 14th International Conference on Human-Computer Interaction, HCII 2011, held in Orlando, FL, USA in July 2011, jointly with 8 other thematically similar conferences. The revised papers presented were carefully reviewed and selected from numerous submissions. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The papers of the fourth volume are

organized in topical sections on HCI and learning, health and medicine applications, business and commerce, HCI in complex environments, design and usability case studies, children and HCI, and playing experience.

PC Magazine Feb 22 2020

Representing Organization

Mar 25 2020 This textbook provides an accessible theoretical analysis of the organizational impact of information technologies. It seeks to examine and comment upon the myriad ways in which actors, organizations, and environments are represented through these technologies. Contemporary threats to

organizational form and stability are considered alongside the potential that information technologies offer to both exacerbate and overcome them. It examines, amongst others, issues surrounding the material and symbolic aspects of information systems; risk and prediction; systems implementation and systems success; knowledge management practices; accountability and other management practices; computerized modelling; and the virtual organization. To this end it deploys a number of different theoretical lenses including: · systems theory · social constructivism · labour process theory · post-

structuralism · actor network theory These offer complementary and contrasting insights into the computerization of managerial work. In order to ensure that the book is both relevant and approachable to students from a range of backgrounds these theories are applied to real examples of the development and implementation of information systems. This combination fosters practical knowledge that is theoretically informed. The book thus aims to bridge the gap between the abstractions of current theories of organization and the grounded material that forms the bulk of Information Systems literature. It thus

offers a novel way into the ongoing debates surrounding technological change and the perennial problems of managerial control. It has been designed to support theoretically informed Information and Technology courses at the advanced undergraduate and postgraduate levels, and will also be of interest to academics in the fields of Management, Information Technology, Sociological, and Cultural studies.

Advanced Distributed Systems
Sep 30 2020 This book

constitutes the thoroughly refereed post-proceedings of the Third International School and Symposium on Advanced Distributed Systems, ISSADS 2004, held in Guadalajara, Mexico in January 2004. The 25 revised full papers presented were carefully reviewed and selected from 46 submissions. Among the topics addressed are virtual characters, distributed toolkits, serial visual presentation, multi-agent architectures, MAS, agent-object hybrid languages, robot soccer agents, distributed querying, semantic search engines, coordination, distributed collaboration, virtual communities, peer-to-peer networks, P2P systems,

distributed search mobile objects, load balancing, distributed algorithms, scheduling, and distributed information systems.
Authority Control in Organizing and Accessing Information Nov 01 2020 In Authority Control in Organizing and Accessing Information: Definition and International Experience, international experts examine the state of the art and explore new theoretical perspectives. With contributions from 17 countries on three continents, this essential resource addresses standards, exchange formats, and metadata, covering authority control for names, works, and subjects. Twenty fascinating case

examples show how authority control is practiced at libraries and other institutions around the world.

Cases on Open-Linked Data and Semantic Web

Applications Jan 27 2023 With the purpose of building upon standard web technologies, open linked data serves as a useful way to connect previously unrelated data and to publish structured data on the web. The application of these elements leads to the creation of data commons called semantic web. Cases on Open-Linked Data and Semantic Web Applications brings together new theories, research findings and case studies which cover the recent

developments and approaches towards applied open linked data and semantic web in the context of information systems.

By enhancing the understanding of open linked data in business, science and information technologies, this reference source aims to be useful for academics, researchers, and practitioners.

The United States Patents Quarterly Jan 23 2020

Sustainable Development

Policy Directory Jun 08 2021

This Directory means that a whole range of built environment professionals need never be caught out by the perversities of policy - in its formulation or on its journey into the real life of you and me.

To have in one place the means of not only burrowing down into any one policy, but also of exploring the interconnections is a precious resource for any professional - 'sustainability literate' or not. Today, nobody who delivers our built environment can be excused from taking responsibility for the future. Armed with this Directory their contribution can only be made more effective. Sara Parkin OBE Forum for the Future This desk-top reference on sustainable development provides essential information for all who need to be up-to-date and familiar with the implications of the legal, fiscal and planning frameworks

around the global and local sustainability agenda. It is relevant to a range of organisations and individuals - from national and local authorities, professional bodies, built environment professions, academia, environmental consultancies, non-governmental organisations and others. Carefully designed to facilitate access for a diverse range of stakeholders, it covers international, European, British and local policies in key built environment themes, and develops their inter-relationship to sustainable development. The Directory addresses each theme in a series of tables which

summarise the policy purpose and also provide web-links to view the specific policy documents. The themes covered are: · Biodiversity · Climate Change · Construction · Energy · Environment · Planning · Pollution · Social Issues · Sustainable Development Policy and Practice · Transport · Urban Development · Waste Management · Water Other books of interest: The Green Guide to Specification Anderson ISBN: 1405119616 Smart & Sustainable Built Environments Yang Hardback ISBN: 1405124229 Sustainable Property Development Keeping Paperback ISBN: 0632058048 Previously Developed Land

Creating Web-based Laboratories Feb 04 2021 Covers the transmission of real-time video and audio for internet experimentation. Provides detailed descriptions of how the various hardware and software systems can be seamlessly integrated for a complete internet remote experimentation system. Contains examples of real working experiments that are currently running.
Bioassays with Arthropods Dec 14 2021 Imagine a

statistics book for bioassays written by a statistician. Next, imagine a statistics book for bioassays written for a layman. Bioassays with Arthropods, Third Edition offers the best of both worlds by translating the terse, precise language of the statistician into language used by the laboratory scientist. The book explains the statistical basis and analysis for each kind of quantal response bioassay in just the right amount of detail. The first two editions were a great reference for designing, conducting, and interpreting bioassays: this completely revised and updated third edition will also train the laboratory scientist to be an expert in estimation of dose

response curves. New in the Third Edition: Introduces four new Windows and Apple-based computer programs (PoloJR, OptiDose, PoloMixture and PoloMulti) for the analyses of binary and multiple response analyses, respectively Replaces out-of-date GLIM examples with R program samples Includes a new chapter, Population Toxicology, and takes a systems approach to bioassays Expands the coverage of invasive species and quarantine statistics Building on the foundation set by the much-cited first two editions, the authors clearly delineate applications and ideas that are exceptionally challenging for those not

already familiar with their use. They lead you through the methods with such ease and organization, that you suddenly find yourself readily able to apply concepts that you never thought you would understand. To order the PoloSuite computer software described in Bioassays with Arthropods, Third Edition, use the order form found at www.leora-software.com or contact the LeOra Software Company at leorasoftware@gmail.com. *AutoCAD 2004 VBA* Feb 16 2022 * Major update of Sutphin's successful AutoCAD 2000 Programmer's Reference. * Introduction to Visual Basic allows use by experienced

AutoCAD developers who are new to programming. * Comprehensive coverage of the AutoCAD object model. * New coverage of AutoCAD 2000 features including file and security programming, customizing the IDE and accessing the Win32 API. VW Polo Petrol & Diesel Service & Repair Manual Apr 06 2021 Hatchback, including special/limited editions. Does NOT cover features specific to Dune models, or facelifted Polo range introduced June 2005. Petrol: 1.2 litre (1198cc) 3-cyl & 1.4 litre (1390cc, non-FSI) 4-cyl. Does NOT cover 1.4 litre FSI engines. Diesel: 1.4 litre (1422cc) 3-cyl & 1.9 litre (1896cc) 4-cyl, inc. PD TDI /

turbo. *Evidence* Nov 13 2021 A flexible and engaging casebook, *Evidence: Cases, Commentary, and Problems* focuses on core concepts and central controversies in evidence law, presented through tightly edited cases, stimulating commentary from a wide range of perspectives, and carefully crafted problems. The Fifth Edition, while as streamlined and teachable as its predecessors, includes excerpts from more than fifty new cases and twenty new articles, fresh problems and enhanced editorial material, and three entirely new sections: one on machine-generated proof, one on digital

forensics, and one on authenticating electronic evidence. There is new, up-to-date material on sexual assault cases, DNA evidence, social science evidence, privileges, judicial notice, hearsay, confrontation, "other crimes" evidence, and other key topics. New to the Fifth Edition: New sections on machine-generated proof, digital forensics, and authenticating electronic evidence New materials on confrontation and hearsay, character evidence in sexual assault and child molestation cases, DNA evidence, social science evidence, "other crimes" evidence, and other key topics Excerpts from more than 50 new cases and 20 new

articles New problems and editorial material throughout Professors and students will benefit from: Flexible structure that allows the book to be taught cover-to-cover in a four-unit, one-semester class, but also can be abridged or rearranged to suit course length and instructor's preferences. Comprehensive coverage with a wide range of perspectives. Text that is written with clarity and concision and includes well-selected and tightly edited cases. A balanced mix of cases, commentary, and problems covering relevance, hearsay, character evidence, impeachment, privilege, expert testimony, and authentication.

Well-written introductory materials that identify key issues, important distinctions, and common sources of confusion.

73 Company Book - GLASSES AND WATCHING

Jun 27 2020 This book is the largest referral for Turkish companies.

Relationship Marketing in Franchising and Retailing Apr 18 2022 This book offers an accessible and comprehensive introduction to relationship marketing in franchising and retailing, especially in areas such as business and marketing management as well as strategic marketing. The topics this book covers include (but is not limited to): (1) relationships

in the context of e-commerce within the franchising sector; (2) franchisees with multiple stakeholder roles: perceptions and conflict in franchise networks; (3) why franchisors recruit franchisees from the ranks of their employees; (4) franchisee advisory councils and justice; and (5) determinants of overall franchisee satisfaction. This book is ideal for students, practitioners and professionals interested in Relationship Marketing, Customer Services, and Marketing Communications. The chapters in this book were originally published as a special issue of Journal of Strategic Marketing.
