**Writing Ground Zero** Sep 27 2020 From Einstein and Truman to Sartre and Derrida, many have declared the atomic bombing of Hiroshima and Nagasaki to be decisive events in human history. None, however, have more acutely understood or perceptively critiqued the consequences of nuclear war than Japanese writers. In this first complete study of the nuclear theme in Japanese intellectual and artistic life, John Whittier Treat shows how much we have to learn from Japanese writers and artists about the substance and meaning of the nuclear age. Treat recounts the controversial history of Japanese public discourse around Hiroshima and Nagasaki—a discourse alternatively celebrated and censored—from August 6, 1945, to the present day. He includes works from the earliest survivor writers, including Hara Tamiki and Ota Yoko, to such important Japanese intellectuals today as Oe Kenzaburo and Oda Makoto. Treat argues that the insights of Japanese writers into the lessons of modern atrocity share much in common with those of Holocaust writers in Europe and the practitioners of recent poststructuralist nuclear criticism in America. In chapters that take up writers as diverse as Hiroshima poets, Tokyo critics, and Nagasaki women novelists, he explores the implications of these works for critical, literary, and cultural theory. Treat summarizes the Japanese contribution to such ongoing international debates as the crisis of modern ethics, the relationship of experience to memory, and the possibility of writing history. This Japanese perspective, Treat shows, both confirms and amends many of the assertions made in the West on the shift that the death camps and nuclear weapons have jointly signaled for the modern world and for the future. *Writing Ground Zero* will be read not only by students of Japan, but by all readers concerned with the fate of culture after the fact of nuclear war in our time.

**Hiroshima** Sep 08 2021 After the United States detonated an atomic bomb at Hiroshima on August 6, 1945, the U.S. government restricted the circulation of images of the bomb's deadly effect. President Truman dispatched some 1,150 military personnel and civilians, including photographers, to record the destruction as part of the United States Strategic Bombing Survey. The goal of the Survey's Physical Damage Division was to photograph and analyze methodically the impact of the atomic bomb on various building materials surrounding the blast site, the first "Ground Zero." The haunting, once-classified images of absence and annihilation formed the basis for civil defense architecture in the United States. This exhibition includes approximately 60 contact prints drawn from a unique archive of more than 700 photographs in the collection of the International Center of Photography. The exhibition is organized by Erin Barnett, Assistant Curator of Collections.

Cold Barrel Zero Jul 06 2021 A CODE HIDDEN IN PLAIN SIGHT. A BLACK OPS TEAM THAT WENT TOO FAR. John Hayes is a Special Operations legend who went rogue on a deep-cover mission and betrayed his own soldiers. Disgraced and on the run, he returns to the United States to get back to his wife and daughter and take revenge on his accusers with a series of devastating attacks. Only one man can stop him: Thomas Byrne. He once fought alongside Hayes as a combat medic, but he gave up the gun. Now a surgeon, he moves from town to town, trying to forget his past, until he is called upon by a high-ranking government official to help capture the man he once called a friend. Hayes and Byrne were once as close as brothers, but with the fate of the nation hanging in the balance and nothing as it seems, both men must decide whom to trust--and whom to betray. In a final, explosive battle for justice, they face off along a rifle's cold barrel. Cold Barrel Zero brings together the blistering pace of Lee Child, the nonstop action of Brad Thor, and the richly drawn characters and moral stakes of Daniel Silva. An experienced reporter armed with deep behind-the-scenes research into America's Special Operations Forces, Quirk takes the military thriller to a new level of suspense.

**Zero Day** Jan 12 2022 John Puller is a former war hero and now the best military investigator in the U.S. Army's Criminal Investigative Division. **Zero Identity** Oct 29 2020 The church that emerged in the wake of the Apostle Peter's sermon at Pentecost was a community transformed by the Holy Spirit whose identity ran counter to the culture at the time. Acts 2:42 does more than just describe the activities of the church; it gives a true picture of who they were. Their devotion to the teaching of the apostles, to real fellowship, to keeping the message of the Lord's Table ever before them, and to deep and life-transforming prayer is far more than just a model for ministry. It is a description of the church's identity, character, and state of being. When comparing the American church of the 21st century to that of the church at "ground zero" in Acts 2, it is easy to conclude that we have gone from a "ground zero" identity to just plain zero identity. Ideal for pastors and church leaders who are deeply concerned about the character and direction of Americanized Christianity, this work is a call for an ontological reformation in the 21st century American church.
