Catecholamines and Behavior · 1 Oct 25 2022 The editor of these volumes has asked me to contribute a brief foreword. When I accepted this honor I suddenly became aware of the enormous progress that has taken place in this field in the 50 years since I began as a medical student, in a humble way, to take interest in the catecholamine system. At about that time some evidence was forthcoming to the effect that catecholamines were an important factor in eliciting emotional reactions, thus secondarily influencing behavior. The great physiologist Walter B. Cannon showed in his classic experiments that when a cat was exposed to a dog it responded not only with overt signs of aversion and dislike, but also with an increased flow of adrenaline from its adrenals. The relationships between catecholamines and behavior have since then become the subject of intense research by physiologists, pharmacologists, and psychologists. Infusion of adrenaline in man was shown to provoke a typical pattern of emotional and behavioral changes. The development of more convenient methods for the measurement of catecholamines in blood and urine led to important new findings. A close association between emotional stress and catecholamine release could be established. This was further extended to psychiatric disorders in which characteristic disturbances in catecholamine release patterns were described.

***Pattern Design: Fundamentals* Oct 13 2021** **Pattern Design: Fundamentals** is an ideal book for beginners to the field of fashion design as well as self-guided learners. **Pattern Design: Fundamentals** covers the basics of pattern making, terminology and drafting concepts. This book is different than all other drafting books of its kind. This drafting book combines knowledge of drafting with sewing and construction. The best way to understand how patterns are drafted is to understand how the drafts are constructed, why certain pattern markings are used and in what order a pattern should be constructed. Understanding the construction, solidifies one's drafting knowledge, connecting the dots of two-dimensional drafting to the three-dimensional finished garment. **Pattern Design** was developed by designer and educator Jennifer Lynne Matthews-Fairbanks. Fairbanks years of instructing at the Fashion Institute of Design and Merchandising coupled with her years running her own design and sewing studio, make for the ideal combination of teaching to the visual and self-guided learner. Chapters 1 and 2 introduce you to the tools, terms and pattern markings, including fabrics used, grainlines of patterns and the grain of a fabric. You will create a simple pattern with all appropriate markings from an unaltered sloper and learn each part of all slopers used throughout the book. In the first section, "Shape," **Pattern Design** walks you through manipulating darts with the pivot and slash and spread methods, creating pleats, tucks and gathers. Each chapter details the basics of construction in order to complete each exercise fully and utilizes several different slopers to show how each

concept can be translated to different garment types. Section two, “Line,” covers style lines (also called seam lines) and combines style lines with design elements from the “Shape” section. The third section, “Details,” includes beginner design detail concepts such as pockets, extensions, collars and banding. Pocket exercises include patch pockets, in-seam pockets and inset pockets. Extensions for buttons and placket for blouses are also demonstrated. The banding chapter covers simple waistbands and sleeve cuffs. The fourth and final section covers “Finishes.” Finishes include facings, zipper insertion and basic hemming. **Pattern Design: Fundamentals** covers the material that most fashion design students learn in their first year of schooling. The book is an ideal guide for self-learners or for classroom instruction.

***The Descent from the Mountain* Apr 26 2020** This 'close reading' of Exodus 19-40 focuses on the repetition of the 'encounter on the mountain'. This double encounter is expressed in a narrative structure of preparatory episodes climaxed by the theophany. The tension of the narrative is linked to 'the people' as the unlikely heroes of encounter and solved by the divine descent from the divine mountain to the man-made tent. The new situation of permanent encounter is foregrounded by the juxtaposed stories of pre- and post- Sinai journey, and the theme of the 'substitution of Moses' underlines a radical reinterpretation of traditional concepts, inviting the reader to embark on a process of identification.
